

SAW TOOL LOAN LIST

SAW provide a limited range of woodturning tools that may be borrowed by members. These divide into two categories:

Specialist tools - are those that may be needed occasionally for a project and so are uneconomic for a member to buy. They can also be used to evaluate a particular tool when making a choice about which tool to buy.

Everyday tools – A complete set of common tools is maintained so there are spares available for demonstrators should a particular tool be forgotten. Beginners may also like to borrow these tools to check their suitability.

Hiring

Tools for Hire are available from the club office table on club nights. They can also be made available on workshop days should members want to evaluate a range of tools.

A deposit of £10 is required to check out a tool and a charge of £2 per month is deducted from the deposit on return.

Contact: Duncan Clark (member729@sawoodturners.org) or at the office table on club nights for further information.
